- Aw man. 2000 words only? Oh geez. Brian Longo. Where to start. Freaking Genius. He knows whats up with math. He is like mathmagician and he can multiply, divide, add, subtract, and all those other basic math shit. He's so cool the awkward silences when he asks if we have questions are fine. My HOME BOYYYY up in here. I wish he was my math tutor and my math TA again. with Hughes. I always draw a super hero version of him on my homework, but i stopped. I dont think it was appreciated enough, but it was still fun. He remembers my test grades. so he has like eidetic memory or something. genius. is it 2000 characters yet? Wellllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllllll Now it is...

- Best TA.

- Brian did a very good job of always summarizing the most important concepts from lecture and providing them to us in section. He was also a huge help on homework problems and helping us through the trickier things we were assigned. I definitely felt free to ask any questions without being judged on if it was a stupid question or not. He was very relatable and approachable, and I was glad he was our TA.

- Brian did an excellent job explaining even the harder problems from the homework, using an explanation based on the topics rather than just working through the problems. He used a clear, straightforward approach to problems that not only helped solve the current problem but set students up to be able to solve more difficult problems in the same topic.

- Brian is a good TA. He explains the material as clearly as possible and is able to answer any question we have. I don't think there's anything wrong with his teaching style for all the times I've been to section. His use of the word "stuff" for a giant explanation to a problem may not be as professional, but it connects better with the students.

- Brian is a very helpful TA for my math class.

- Brian was a pretty good TA. He is very knowledgeable about mathematics and helped me get through some tough homework problems. Overall the course becomes much easier if you have him as a TA.

- Brian was extremely helpful to me in understanding each week's homework. It should be commendably noted of him that he often answered questions of individual students after the scheduled discussion time. He always came prepared to section, and when we asked questions about homework problems he seemed very familiar with them. His work on the board was very clear and I really appreciated that even after solving the problem he asked the class if there were questions about it. Overall I was very pleased with sections and the way Brian worked efficiently and enthusiastically, and yet at the same time at a level we could understand.

- extra-longo knowledge, extra-longo passion, extra-longo everything

- Great job! You really helped me this quarter.

- Great TA. Brian went through things step by step if needed and would repeat himself during homework problems if not clarified in lecture or before.

- His explanations were very clear and he made everything very easy to understand.

- I really enjoyed this TA's section. It was very helpful and the information was relevant and definitely supplemented my understanding of the course.

- It was easy to get distracted during discussion, e didn't really grab my attention.

- Lacked enthusiasm, often unprepared, had difficulty solving problems. Overall an unhelpful TA.

- Provided excellent help in helping us understand the material. Would occasionally get hung up on one problem, but that's okay, as they were difficult problems.

- Seriously really helpful. Nice guy, fun to talk to and always approachable. Great TA. Also teaches the material extremely well.

- Teaching was flat

- When going to discussion with Brian it felt like I was getting enrichment for the course. In discussion, Brian would review over the material and provide an explanation for topics that we did not understand. His explanations were clear and easy to understand, which made the course easier to understand. Brian is a excellent TA and I would recommend anyone to have him for any course.
