9. Do you have any other comments to add to your evaluation? 

*Please provide any additional constructive comments*

- Christian is fantastic. If he ever wants a lecturer or professor position, I highly recommend him.
- Christian is the best TA I have encountered. He explains things very clear which is really important and I would definitely recommend him to other students.
- Christian was always helpful, available, and knew the subject matter well. I highly recommend him.
- Christian Woods is a decent TA. He explains things very well and does a good job at covering the material that we need him to cover. However, he is a bit robotic. It would be nice if he had a little more charisma.
- Discussions were very helpful for solving homework problems. Christian did his job very well, and there was always plenty of material to cover.
- Great TA, really understood the course material and taught it to us in a way that helped us understand as well
- Great work!
- He explains things very clearly. And actually teaches concepts, especially if you ask.
- He is so helpful and he is the key of my success in that class.
- He was a good TA who wanted students to fully understand the meaning of every questions. Thus, he sometimes failed to manage time to cover all problems that students need to have solution of because of poor time management.
- He was extremely helpful. There was only one question that, even after his explanation, I did not understand how to solve. (The multiple extended basis problem)
- He was pretty cool, knew what he was doing, and explained how he was doing it, which helped immensely for the course.
- I like him as a TA
- I really enjoyed his way of working with math, and he would stay back and let me ask rather off-topic but still math-related questions. Very nice as well.
- Obviously very familiar with the course material and always prepared to answer questions. Never had the common issue of being stumped by a problem in front of students. Highly recommend Christian as a TA.
- Perfect!
- Smart guy, knows his material and is interested in developing his ideas, even if it means explaining a problem five times in a row. Very patient, office too small.
- Strongly Recommended
- The best TA EVER
- This was my best TA so far in college, and if I could I would want him to do it again. As it is I may go to him for help again next quarter just to gain greater insight on the math that I'm doing.
