- Christian has been one of my favorite TAs I've had throughout my time here at UCSD. He's extremely helpful in explaining homework problems and answering questions from lectures. He was clear about the methods he used to solve certain problems that were not mentioned in class. Coming into his office hours and discussions has been more than helpful and enjoyable.

- Christian is a great math instructor and a congenial TA. Math 152 Spring '13, in almost every aspect as a course, would not have been do-able without him. This is a sentiment shared by all students, and likely the professor too, in the class.

- Christian is by far the best TA i've come across in the Math department. It could be due to the course (Game Theory) that makes it interesting, but Christian also only displays clear knowledge of the material, and attempts to make discussions interesting by engaging us in games (related to class material).

  He is patient and willingly goes over material to students who are unclear of concepts, and tries to teach us how to solve homework problems instead of just providing the answers. Definitely one who is sincere in his teaching.

- Christian is one of the best TA's I've had in the Math Department--really helpful!

- Christian is one of the most professional people I have ever met. He is extremely interested in helping students with the subject material. He cares so much about the class. I would not have been able to do well in this class without him. His office hours are amazing and I don't even like to leave them because he makes the course that interesting.

- Christian was one of the best TAs I've had at UCSD. Thank you for being helpful!

- Christian Woods is hands down one of the best TAs I've ever had in my three years here as a student and math major. He was very clear when it came to explaining how to do things, what we needed to know, and helping with any questions. He was understanding and I probably wouldn't have passed the class without him. Thanks Christian!

- Excellent job teaching the fundamentals and methods rather than formulas.

- Great TA - explained the subject material very well.

- He was one of the best Math TAs I have ever had in my time at UCSD.

- I honestly love Christian. He is probably if not the best, one of the best TAs for math. He genuinely cares about the students. He makes himself really easily accessible to students. He stays later in discussions and office hours to help clarify students questions. He not only explains concepts but goes above and beyond into finding other examples to help students learn. He responds promptly to emails and addresses issues RIGHT away which is amazing for a TA to do. He is on top of this class. He is great at explaining the material and is SUPER helpful. I wish I had him for all my undergrad math classes, he would have definitely been influential and make a better experience. All in all, Christian is really amazing and I really appreciate his contribution to the class in helping people understand. He's such a great person.

- I really liked how he would review course material first rather than diving into homework questions. He is very clear and thorough in his explanations, and he is also very efficient with his time. He is usually able to go over concepts in much more detail and in less time during section as compared to lecture

- ONE OF THE BEST TAs I EVER HAD AT UCSD.
• Please advice professor to get rid of online midterm. I think it has tendency to be problematic rather than promoting hard work.
