9. Do you have any other comments to add to your evaluation?

*Please provide any additional constructive comments*

- Amazing TA. Cared very much about the students. I would always try to go to his discussions and reviews over my actual TA.

- Awesome TA. Held review sessions before the midterms that were really helpful.

- Best math TA I've had so far: organized, easy to understand, great skills in conveying reasoning behind solving problems, office hours were really helpful!

- Best TA I have had so far, has a complete knowledge of the subject and was able to explain it in a clear way.

- Christian explained the homework problems and past midterm questions extremely clearly and showed all steps and explained why they were done. His sections definitely helped me
tremendously with studying for midterms and especially with tough homework assignments. I would definitely recommend him to other math students.

- Christian is a fantastic TA. He makes the course material so much easier to understand.

- Christian is an awesome, awesome TA. He goes through problems slowly and really encourages students to participate in the problem-solving process. He never just gives the answer, but carefully leads students in the right direction. He's also willing to go over lecture material again if a topic presented wasn't clear or the professor ran out of time to fully explain it. I would recommend Christian to anyone!

- Christian is great and so willing to put in extra time to help out his students. Thanks for often being more help than the actual lecture!

- Christian is my favorite TA ever in Math because of the way he explained things. He really knew how to break down scary math concepts and explain it in a way that made sense. He was also really good at not making it too awkward after no one would respond to his questions; I'm glad he would just go straight into explaining things despite sparse participation.

- Christian is one of the most amiable and best TAs I have ever had. He is always help solve problems and he doesn't straight tell you the solution, he interacts with you and lead you to solve the problem

- Christian is the best! He's always available to help outside of section and does a great job explaining all of the concepts! 4 for you Christian Woods! You go Christian Woods!

- Christian rocks

- Christian was great, and super helpful! Thanks :) 

- Christian was the best. Every week I would email him asking for help with math homework, and he always responded promptly and made time for me to come into his office for extra help.

- Christian Woods is an excellent TA. He is very adept at supplementing Dr. Eggers' lectures. Best math TA i've had thus far.

- Clear explanations and very respectful towards students.

- Explanations were sometimes more in depth, and fantastic if you have a decent grasp of the material, but explanations of very basic concepts were not always super clear

- Great TA who really understands the concepts behind the material and explains them well.

- He explains things very well and doesn't answer questions ambiguously which is great!

- He is a master with the material and clears up any question a student may have with the material.

- He was excellent.

- He was fantastic. I loved going to section every single time. He knew the information so well that he could teach us the theory that could have missed in lecture. I highly recommend him.

- Horrible Grader, very unfair grader...

- Keep up the good work!

- One of the best TA's I have had. Kind, funny, and very helpful.

- Questions in section were answered, but sometimes rather slowly. Could be done faster and therefore more questions answered

- The TA often explained materials more clearly and more thoroughly than the professor.
• This guy was a good TA, answered questions, taught us how to do the problems, and yea, #goodTA

• Ummm you are like the best TA I've ever had... sometimes taught better than the professor. You should consider being a professor... P.S. don't tell the prof I said this

• you're aight
