

**Math 186, Winter 2009, Prof. Tesler  
Midterm Announcement**

- Time and place** The midterm will be in class on Friday February 13. You'll have 50 minutes.
- Material** The midterm covers the material on homework assignments 1–5.  
Study your lecture notes, course slides/handouts, the homework problems, and the book (the parts of chapters 2 and 3 that we covered).  
For additional practice problems, do problems similar to the assigned ones.  
If you want to use your homework 5 for studying for this exam, please make a photocopy of it before you turn it in. Your previous homeworks can be picked up from Chris.
- Supplies** Please bring your student ID card, pencils, erasers, calculator, and “cheat sheet” (described below). We'll supply a test book, so you don't need a blue book or scantron.  
**No other resources are permitted. If you bring your cell phone, pager, or other electronic device, be sure that it is disabled and stashed away.**
- “Cheat Sheet”** You may bring one **double sided** sheet of notes,  $8\frac{1}{2}'' \times 11''$ . It must be written by hand by you in pen or pencil; it may not be produced by any other means (computer, photocopying, purchasing pre-made reference cards, etc.).
- Office Hours** Chris Chang will hold a review session Wednesday February 11, 4–5 p.m., in AP&M 5402.  
Prof. Tesler will move his Friday February 13 office hours to 9:30–10:30 a.m. so you can ask questions that day before the test instead of after.
