

Check List for Final Exam

- Attended one Zoom test - highly recommended; it is your responsibility to check that Zoom works and do not expect any tests during the final exam.

- Make sure the device used for Zoom has proper charging and/or access to power for the duration of the final exam.

- Prepare your working area and the placement of the device used for Zoom such that the instructor can clearly see the working area and the face of the student.

- Have 20 sheets of blank paper ready for the exam; do not worry, I do not plan on assigning that many problems.

- On one sheet write on the top "I excel with integrity" and sign it; then right under write Problem 1 and this will be the sheet you will use for the first problem; this will also be the only page allowed to have something written on. By writing this statement and signing it, you acknowledge that you have read the Integrity Pledge I have sent out; while you may be familiar with most of it please pay particular attention to the following sentence:

"I acknowledge that sharing the content of the final exam for Math 142B with anyone before the official end time (Thursday March 19, 11:30am) constitutes an academic integrity violation."

- On Thursday morning, once you have access to the final exam there are two options: print it (if you have access to a printer) or write it down (you will get the time spend on doing so back).

- If you lose connection to Zoom during the final, do not panic! Call my cell-phone (to be shared at the beginning of the final) and try to login again.

- Once done with the final exam, you will need to upload it on Gradescope in the usual way; there will be a Final Exam assignment where you can do so. You need to let me know that you are done with your final by raising your hand so that I can be aware that you are uploading your exam on Gradescope. You have 5 minutes from the moment you inform me that you are done until you finish the upload. This becomes particularly sensitive with students who use their phone both for Zoom and for Gradescope.
