

## Guidelines for submission through Gradescope

- Submissions must be PDF files.
- If your homework is handwritten, you must upload a scanned document. Here is how you can scan your written homework on a mobile device: <https://help.gradescope.com/article/0chl25eed3-student-scan-mobile-device>
- You may type your homework (using LaTeX, for example) and save your file as a PDF.
- You may write your solutions using a tablet device.
- Gradescope will ask you to match each of the exercises with the page on which your solution for that exercise appears.
- You can do the submission several times before the deadline and the latter submission will automatically overwrite the former submission.
- For more information, watch the Gradescope tutorial video: [https://gradescope.com/get\\_started#student-submission](https://gradescope.com/get_started#student-submission).
