9. Do you have any other comments to add to your evaluation?

*Please provide any additional constructive comments*

- Although sometimes, he didn't bring in the homework or the midterm that we should have been given back, he was a good TA, always helping us out on homework problems, and trying to make the best of the time he had to help clear up questions we had.

- Amazing TA. I would go to him for all of my questions.

- Good at explaining difficult to explain topics in multivariable calculus

- Great ta

- He is always willing to help even if it means staying half an hour after his office hours to explain the material in depth; Has great patience.

- He is amazing! Really cares about his students success in learning the material. He is also very good looking.

- He is great at explaining the material in a way that really compliments the lecture and easier to understand.

- He is very helpful and his interest in our learning is very kind.

- He just ask if students has any questions and sometime we wait like 4 to 5 mins, and a lot of students just leave the discussion just because of this. He does not any plans if students do not have any questions.

- He was very helpful and always answered questions directly. Made the concepts easy to understand, and clarified a lot of things from lecture.

- He's a bit comical sometimes, but I like how he emphasizes the class concepts while going through people's question problems. Most of his explanations facilitate good note-taking that will help us to remember and understand it later.

- HES SO NICE!!! HE IS SUCH A NICE TA!!! HE IS SO GOOD AT EXPLAINING CONCEPTS AND ANSWERS QUESTIONS WELL TOO!!!

- I am not enrolled in Roman's sections, but go there to have my questions clarified. He is very approachable and patient. He doesn't just give us answers; he actively engages us in math learning by asking us questions that will help us solve the problems. Speech is very clear and pace is great. Thanks!

- I loved that he went above and beyond to provide practice tests before every midterm/final for the students.

- I only attended one of his sections but he spent the whole hour trying to solve one problem, which I feel that he should have been prepared for. It was disrespectful to the students and a waste of my time.

- My go to TA. Very clear in explanation and if you dont understand something he will re explain it until you do.

- Pretty awesome guy. May have convinced me to switch into a mathematics major.

- Roman is an extremely helpful TA that really cements the material taught in lecture. He is the most active TA on Piazza, and even extended his office hours multiple times before exams. His sections were fun to attend, not only because he taught well, but because he always had a story to share. Highly recommended!
• Roman, are you okay? You always look so sad. I’m sorry I stopped going to discussion.
