- Sawyer has definitely encouraged students to ask questions. He has emphasized numerous times that there is no dumb questions. Furthermore, he does not record his discussion sections (he uploads his discussion notes, which are usually in-depth and clear) and doesn't require students to turn on their cameras because he WANTS students to feel comfortable asking questions.

When he's going over questions, he does it in a way that's clear, complete, and concise. It's clear that he knows what he's talking about. Usually, his examples are more advanced and a bit abstract than what is taught in class, but the way he goes over the questions are insightful and actually makes sense.

When I attended one of his office hours session, he answered my question in multiple ways, giving me choices on how I can solve a question -- this is something I found particularly interesting since, from my experience, TAs usually just teach you what the instructors teach you. Regardless, though, I found that to be very nice as one of the methods he showed me made more sense than the method that was taught in-class.

Awesome TA. I would definitely recommend Sawyer to future students.

- Sometimes the discussion sections felt like they went a bit beyond the scope of the course but otherwise very helpful and clear!

- Super nice guy. However, whenever I really needed help he would be too general to help me make progress on a problem. He also speaks super fast.

- Swayer seemed to struggle at the beginning of the quarter with the online aspect, but over the course of the next weeks he improved exponentially and he is now one of the best TAs to interact with.

- Thank god for his extra practice, it really solidified my understanding of the concepts the professor covered that week
