1. I think that if she had attended classes with the rest of us, as all of my other TAs do, she would have been able to offer very helpful information in the TA section. Many people did not go to the TA section because there simply wasn't any reason to. There was not any special lessons over material so that we could remember it better and no extra hints or tips following the second or third week that would have helped prepare for the class.

 2. Taylor was very passionate about the subject she was teaching, and was always eager to help us. She explained everything clearly and encouraged us to ask questions. Out of all my classes, she is the most dedicated teaching assistant.

 3. Taylor was extremely thorough at explaining the materials I didn't understand during class homework.

 4. She genuinely put forth effort in an attempt to help her students succeed in this course. Whether or not the students cared enough to accept her help and be successful.

 5. Her explanations were confusing and didn't make much sense at all.

 6. Thank you for all your time, effort, and help!

 7. Taylor was extremely clear when she described subject matters. She never became frustrated with the class if we did not understand. She is clearly very talented and knowledgeable in the subject of math. She was even willing to extend her office hours if students could not make it. Very attentive and helpful. Would not have survived the class without her.

 8. Taylor was obviously very passionate and good at math, however sometimes she was unable to answer questions that we had. If she was better prepared for the class, perhaps by reviewing what we did in class before she taught TA session, she would better be able to answer our questions. She was very kind, respectful, and patient.

 9. TA was very knowledgeable and explained practice example problems in a very understandable manner.

 10. Pretty sure there was only one problem all semester she had a pretty hard time solving, and even then she emailed us later that day with the solution. She was you were? Not really sure who's gonna read this very nice and approachable.
