1. Taylor is a wonderful TA, but she does not answer your questions straightforward. I think that is the point, but I wish I had more confirmation on whether I am approaching a problem correctly. She is very knowledgeable and really understands what you are trying to ask. I did not enjoy this course, but Taylor really helped me pull through.

2. I feel as though she is more helpful than my actual professor himself and approaching her with questions is easier and more efficient than it is with my professor.

3. Taylor was available for extra help. I had no foundation in the course and she made herself available to me. I feel this made me do a lot better in the course. She was did very well.

4. She never gave me answers. Instead, she made me think and guided me through a calculus thinking process.

1. Taylor was a really great teaching assistant for calculus. She was always able to help during class and she showed great interest in the subject. In addition, she was always kind and respectful, which made her really approachable.

2. Taylor was a really insightful TA at first, I felt pretty weak in the area of Calculus, but with her encouragement, I embraced all of what this field had to offer. I also appreciate how she allowed us to wrestle with the problems we encountered first, then she gave us helpful hints without mentioning the whole answer. Overall, I enjoyed having Taylor as my TA, and wish her the best in her career!
