In this class we will use gradescope for turning in homework assignments. This assignment is to help you learn how to upload assignments to gradescope.

Make sure to include your name and student ID in the top right-hand corner of your assignment. For longer assignments this only needs to be done on the first page.

Create an account with Gradescope (Important: use your @ucsd.edu address). If you already have a Gradescope account linked to your @ucsd.edu address, then you do not need to create another account.

Read the guide for submitting homework on Gradescope and watch the video For students: submitting homework.

Log into your account, find the course Gradescope page, select the correct assignment, and upload your scanned assignment following the guide in the previous step. If you cannot find the course Gradescope page, then you may need the course entry code: 9DY4B5.

Answer the following questions:

(1) Do you think Brandon’s voice is sufficiently loud and clear?

(2) Do you think Brandon’s handwriting is readable?

(3) Do you view mathematics as something that is created or discovered (meaning it has an existence that is independent of humankind)?

(4) Do you think science makes philosophy more important, less important, or neither... or are you not sure?
