

The supreme misfortune of birth overtook me on March 26 1913 my parents were both mathematicians. I got my Ph D at the Univ of Budapest in 1934 and went to Manchester. I got a Doc there in 1939. From 1938 to 54 I stayed in the U.S with some interruptions (England & Hungary) From 1954 until the present I travel constantly all over the world about one third of my time I am in Hungary one third in the U.S and one third the rest of the world.

I got the Cole prize in of the Amer Math Soc. in 1951, got elected to the Hungarian Math Academy of Sciences in 1951 I got two National Prizes in Hungary and the Wolf prize in 1984.

I am an honorary ^{life} member of the New York Academy also a member of the Dutch the U.S and the Australian Academy. Also an honorary member of the London Math Soc the Dutch + Israeli math soc.

I have an honorary degree from the Univ of Wisconsin Wisconsin & Univ of York (England) Univ of Hannover

Hannover (Germany) Technion Haifa Israel and Waterloo
Canada.

I can not yet predict the date of my cure. I am
or + n but can still prove + conjecture thus the time
is perhaps not yet ripe for changing pills.

I nearly forgot I am also a member of some old
academy of New England it is centered in Boston.
