- Good, friendly TA. Explained things very well and clearly.
  Gave useful/helpful practice problems in discussion and thoroughly explained things.
  Very helpful during office hours. Also has a good amount of office hours.

- Great TA.

- Hands down the best TA Ive had so far at UCSD. This man has a bright future as a professor.

- He's really makes you think

- I definitely appreciate you sacrificing most of your Thursday's towards this course and helping us navigate through it. Out of all the math classes I've taken at UCSD, you're the most helpful TA I've come across, and I think all of us enjoy how you're casually friendly with the students who engage in the material. Best of luck to you in your upcoming years!

- I LOVE JASON!!! He's one of the best TAs I've had. He was super helpful and guided you to the right answer without giving it away. Really great TA and you can tell he cares about the students and their success.

- Jason Oneill was extremely patient, instructive, and insightful. He was a huge help to my enjoyment and success in the class.

- Jason provided some great questions and insights. His explanations were sometimes less thorough than John's, and he emphasized practice problems more, but his explanations of some difficult subjects were clear. He wasn't even my TA, but I often would stay for his discussion so I could get some additional practice problems and make note of some alternative ways to think about problems.

- Jason was a fun TA. He asked at the beginning of the quarter whether or not students wanted the discussions to be centered on homework help or practice problems, and as a result, each week began with a couple sample problems for students to work on throughout the discussion, while he walked around and assisted students and passed back assignments. At the end, he covered the solutions and addressed any questions. This was not my discussion section but I found it useful and engaging to attend to supplement my understanding.

- Jason was a great TA for this course; he was able to reason through and explain some dense concepts during section, which made class materiel more accessible.

- Jason was very helpful when it comes to explaining concepts and helping students understand each topic and homework problems.

- One of the best math TA's I've had at UCSD. Jason is a king

- This instructor was extra picky on grading the midterms. This instructor took off 10% of my midterm grade for tiny tons of my explanation. I saw this instructor getting frustrated and mad at a Chinese student who wrote exactly same from the textbook, but still got points off due to this instructor's picky rubric.
