- Overall, the problems provided were really helpful to learn and figure out how to solve certain problems in the course. However, these problems never really helped with the exams within the course yet I blame this on the instructor, rather than Tanny. The reason I'm typing this is because I want to clarify why I believe the section wasn't as useful as it could've been. Tanny has a really good understanding of the material within this course, which really helps when he explains how problems are solved during section.

- Tanny was very helpful in answering any questions I had.

- While some of the instructional content was helpful, it was all stuff we could learn on our own because he pulled the practice problems right out of the textbook. I have two points of constructive feedback. 1.) come up with unique practice problems. 2.) If a student emails you for help on a concept, please respond in full and don't just tell them to watch the lecture. Chances are if they email you because they don't understand a concept, they already have watched the lecture and need further elaboration on said concept because the lecture didn't make sense to them.
