9. Do you have any other comments to add to your evaluation?

Please keep your comments constructive and professional, abiding by the Principles of Community

- Great and easy to understand TA. We often discussed homework problems (typical in any math discussion) and I wish his notes were a bit more cohesive. They are often scratch notes and the hints were sometimes ambiguous later on but was framed quite well through explanation in words during the discussion. Otherwise, he is a very approachable and welcoming TA.
- It's pretty minor, but sometimes the pace is a little slow so we didn't cover a lot.
- Tanny was very helpful in assuaging students fears about the class and was a great help whenever students needed help. He never solved any questions directly but always provided good hints and would point you in the right direction needed to solve the question. As an IA, he was humble, passionate, and empathetic. I've decided to stick with this class instead of dropping. Looking to the future, I feel a lot less nervous about what grad school is like knowing there are people like Nathaniel there who just love math and are willing to help others.
- Thanks for carrying the Math 100B experience! The technical kinks and timing shenanigans make things tricky, but when they are right, the discussion sections greatly helped with grasping the very tricky math concepts (as with Math 100A).
