Gradescope Assignment Due at Noon on Saturday, March 14

The point of this assignment is to make sure that you understand all of the exam instructions and to make you feel at ease about the process of uploading your final exam to Gradescope.

The problems on the final exam total to 46 points. This assignment is worth an additional two points of your final exam score, making the final out of 48 points. You must complete this assignment by noon tomorrow (do it today instead though!) to receive those two points. Even if you do not complete the assignment, your final will be graded out of 48.

For full credit, you must complete each of the following ten problems on a separate page, just like you will tomorrow. Then upload the document to the “Practice Submission” assignment in your Math 20B Gradescope page.

1. Write “I understand that I must check into the final exam by 2:40 pm on Saturday, March 14, and that if I do not, I will not be able to take the final exam.

2. Write “I understand that I must bring ten blank pieces of paper to my final exam.”

3. Write “The only resource that I can use during my exam is my cheat sheet. My cheat sheet can only be one piece of paper, but I can write on both sides.”

4. Write “I understand that I will not be able to ask any questions about the exam problems after the exam has started. I must ask any clarification questions on the problem statements before the exam starts.”

5. Write “I will keep a clock or watch near me during the exam because I will not be allowed to touch my computer or phone during the exam.”

6. Write “When my proctor shows me the exam questions, I will write one exam question at the top of each of my ten blank pages. I know that only one question out of the ten has multiple parts, and that I should write all three parts on the same page.”

7. Write “Each of my solutions must be self-contained on one page. I cannot use the front and back of a page for the solution to one problem because my final upload to Gradescope can only contain ten pages.”

8. Write “I can only touch my electronic device/phone after I am done with the exam, at which point I will text the word “done” to my proctor.”

9. Write “Before I submit my solutions to Gradescope, I will check that the problems in the document appear in the correct order and that I did not accidentally submit scratch work instead of my solutions.”

10. Write “I love calculus, and it loves me back. I will do well on this exam.”
