Part One:
1. What was your primary reason for taking this class?
   - [ ] Interested in exploring teaching as a career
   - [ ] Hoping to improve math/science problem-solving and thinking skills
   - [ ] Needed more units and this sounded interesting
   - [ ] Other (please explain in the space below)

2. After taking this class, has your interest in teaching as a possible career:
   - [ ] Increased
   - [ ] Decreased
   - [ ] Stayed about the same
   Comments:

3. What is your current major?

4. Are you already, or will you consider becoming, a Mathematics Education minor?
   - [ ] Yes
   - [ ] No
   - [ ] Undecided

Part Two (Continued on Next Page):
1. Describe how Math 95 was different (if at all) from your other college math courses.

2. Has your experience in Math 95 affected the way you approach your other mathematics courses? Give examples if you can.
3. Has your appreciation of the role of mathematical justification in helping students understand mathematics changed as a result of taking Math 95?

4. Has Math 95 changed your understanding of what it takes to be an effective mathematics teacher?

5. (Question particular to remote offering) Do you think it would have been better for the instructor to write her notes/solutions using an ipad and apple pen, or did the doc cam and handwriting work well for you?

6. (Applicable to remote or in-person offering) Do you have any suggestions for improving this course?
