- Did not have contact.
- He offered office hours 4 days a week and was always available outside of class hours if we needed help. He also explained things in a way that made sense to me, which was really helpful.
- He was a great TA, the section was not required but I went when I had questions and he always answered them very clearly.
- He was very enjoyable and made ways to teach the material easier and more understanding. I liked his energy and he was a good TA that helped me better the course.
- I attended a few of Scotty's office hours and he was very helpful. The way he talked to us was very motivating because he truly wanted us to learn the content. He also walked through the more difficult problems that appeared on the homework and tests. It seemed like Scotty enjoyed teaching so it was enjoyable for me to learn math. I appreciate the effort he put into office hours to teach us content.
- I don't really like math, but Scotty actually made me want to come to our sections. I really enjoyed his teaching!
- Scotty always comes prepared with practice problems and explain them well. Recommended!
- Scotty helped students with problems by working through it with the section. He would ask questions to guide the students to the right answer and not give the answer right away. I appreciate his work, though I think it was a bit awkward or tough to participate in discussion because there weren't many attending section.
- Scotty is a great teaching assistant! His office hours are super helpful and he's such a funny guy I would totally recommend taking his discussion section!
- Scotty is probs the best TA I've had thus far while attending UCSD. He really cares about his students and goes above and beyond to make sure you understand the concepts and learn how to solve course problems. I'm truly going to miss Scotty :,)
- Scotty is such a nice human being. He is so patient and good at explaining things. I have a lot of respect for him and think he really knows what is up with math. What a wonderful person. Bless.
- Scotty is the best IA I've ever had he truly cares about the students success, always available for help, and explains concepts in a clear understandable way.
- Scotty really helped me understand the material in this course. In both office hours and section, I felt like I had a better grasp of the material through his explanations and steps, that I wouldn't normally have gotten simply by going to lecture. He had a nice and approachable attitude.
- Scotty was an amazing TA! I would usually never go to section when it comes to math but his sections were very helpful, he knows how to balance provision of answers vs students solving the problem. He also is very knowledgeable on the subject!
- Scotty was extremely helpful. He made sure that he had plenty of office hours to help students out and he almost always responded to emails immediately. He always thought of new ways to explain a topic to ensure that I would understand it.
- Scotty was literally the only reason I am passing this class, best TA ever. He made sure I understood the problems no matter how many times I asked him to repeat himself. He was so

good at answering my questions in a way I actually understood the process. You are doing great! Thank you for everything:)

- Thank you!! I don't know how I would've passed math without your help. I appreciate it!
- Very interesting TA! Also very helpful and passionate about math which really helps with learning. He posts notes to canvas and they're very detailed and helpful. His passion for math shows and leads to very helpful discussions and extra detailed knowledge about the course material.
- Very nice person and helpful instructor
- Was very good at explaining concepts and was very enthusiastic about the material.
