9. Do you have any other comments to add to your evaluation?

Please keep your comments constructive and professional, abiding by the Principles of Community

- He was friendly and created a comfortable learning environment.
- Scotty was always so respectful of the class and challenged students by asking questions, but wouldn't make students feel bad for not knowing the answers to his questions. I really liked that he showed us different resources like graphing phase planes and visualizing the answers if we were still confused. Our discussion was very small (normally 3 or 4 students) and so I was able to ask many questions and get through way more course material than my other class discussions where TA's would go over 1 problem for 50 minutes. Overall, Scotty was very knowledgable about the course and would thoroughly go over sections better than even the professor. (Although the professor was great too!) I really enjoyed this quarter by having this class.
- They were always prepared for discussion, either reviewing material or going over very helpful examples with us. Whenever we would have questions they would take their time to make sure that we understood what we were doing. Overall, they were extremely helpful in learning this difficult material.
